```python
# Print whether the sum of the first, third, third-last, last digits of a 10 digit number is divisble by 3 or not
s=0
n=int(input("Enter a number:"))
a=n//1000000000
print(a)
x=n//10000000
b=x%10
y=n%1000
c=y//100
d=n%10
print(b)
print(c)
print(d)
s=a+b+c+d
print(s)
if s%3==0:
    print("CODE SUCCESS")
else:
    print("FAILED")
```
